Whiting Premium Quality dry freight roll-up door

The roll-up that made Whiting famous

The standard
of quality for the
transportation industry

In 1953, Whiting invented the world's first practical roll-up door for trucks and trailers...The Whiting Premium Quality Roll-up dry freight door.

Since then, the transportation industry has undergone many changes. And our top-of-the-line roll-up has changed with the times – with over 121 engineering improvements. Some you can see at a glance, like our 2-cable balancer and our E-Coated hardware. There are other more subtle improvements, too. Hinges with removable caps and removable roller carriers to make maintenance remarkably easy. And Whiting's patented steel rollers – Guaranteed for five years.

The Whiting Premium Quality roll-up doors you specify, when you order your truck or trailer bodies now, are as far ahead of the industry as they were when Theo Whiting designed and built the world's first practical roll-up door for the industry in 1953.

Our roll-ups are still built in our own plants by the Whiting Family.

Designing and manufacturing efficient, long-lasting doors that are easy and economical to operate are what we do.

If you're now using Whiting roll-ups, Thank You. If not, kindly give us a call and we'll be happy to give you further information.

A few of Whiting's exclusive features:

Optional aluminum bottom channel with replaceable vinyl seal.

End hinge and roller carrier. Removable cap allows roller change without removing hinge.

Cam lock allows one hand operation. Easily accommodates padlock or car seal.

Removable roller carrier fastened to full width bottom channel for strength.

Top closure bracket can easily adjust top panel to provide tight seal at top of door.

Optional patented steel roller guaranteed for 5 years.

In every field, there's one that stands out.
