Whiting Hinged Truss II

Dry Freight Roll-Up Door

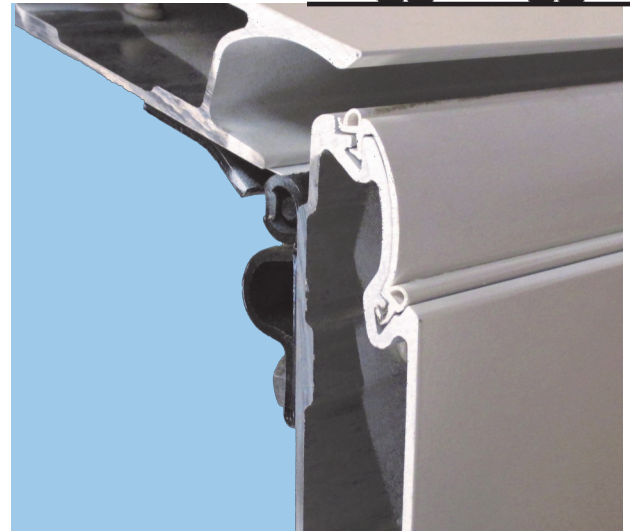

The only door which may outlive your vehicle!

Double wall aluminum extruded panels form a truss to make this dry freight door the most durable and strongest door Whiting has available. This superior door readily accepts automotive quality paint and decals and will not swell, chip or warp.

PVC joint cover guards against oxidation streaking. Sloped design with weather seals keeps moisture out.

Equipped with 2" roller and 2" track to withstand rough service, this door is the last one you will buy for your fleet.

Also available with optional steel rollers and stainless steel hardware.

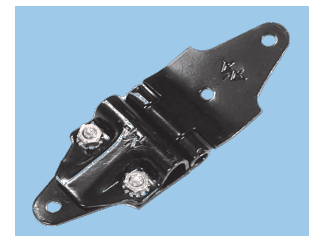

Product Features

- Durable double wall extruded aluminum panels
- Double sealed contoured panel joints
- Heavy duty 7181 bottom roller brackets
- No thru-rivets allows for easy decaling
- Two spring independent suspension balancer
