

# Whiting PremiumPlate Composite Roll-up Doors

Available in 1/4" or 1/2" thick panels

World Class Quality  
Made in the USA.

## New Technology. Whiting Quality.

Whiting delivers the advantages of composite technology along with the quality and reliability you've come to expect. Whiting PremiumPlate doors are manufactured with Polyethylene (PE) composite panels bonded to prepainted high-tensile strength steel faces for a high impact surface that's durable and weather-resistant.

Whiting PremiumPlate doors can be used for upgrading existing fleets or for new builds. These dependable doors are engineered to your exact specifications and use premium Whiting hardware making installation a breeze.

## Product Features:

- Composite core panels feature an extended warranty
- Tongue and groove joints align panels for a tight, secure fit
- Rigid bottom U-channel with replaceable seal
- Whiting patented roller-change hinge design
- Uses standard Whiting premium door hardware for easy maintenance and replacement
- All hardware e-coated to prevent rust and corrosion
- Stainless steel rivets are standard

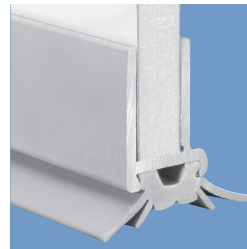

## Panel Composition

- Polyethylene core is corrosion resistant
- Available in nominal 1/4" and 1/2" thicknesses
- Continuous process bonds facing material to core
- Prepainted 80K HDG steel faces provide stability and durability
